

Public Notification of Treatment Facility Overflow (TFO)

Occurrence: December 22, 2022, 3:12AM

Approximately 400 gallons of spent backwash water from the tertiary filters at the Village of Random Lake Wastewater plant overflowed unto a grassy area inside the fence at the Wastewater Treatment Plant. This water from the tertiary filters was treated effluent but had some suspended solids and phosphorus removing metals.

There was no exposure to the public or employees. No risk to the environment.

This public notification is required according to s. NR 210.21(5), Wis. Adm. Code.
